

CALL FOR ABSTRACTS

LYMPHOMA SYMPOSIUM

The overarching theme for the Berlin 2026 lymphoma symposium/workshop will be "The microenvironment of lymphoma and lymphoproliferations" with the following five sessions:

- Microenvironment and B-cell lymphoma
- Microenvironment and T-cell lymphoma
- Microenvironment and Hodgkin lymphoma
- Microenvironment and immune privilege sites
- Recent advances

The scientific program includes a mixture of Keynote and Topic Lectures supplemented by oral abstract and poster presentations. Other highlights include the Karl Lennert Lecture, David Mason award and Meet the Professor Sessions.

BONE MARROW SYMPOSIUM

The 2026 EA4HP Bone Marrow Symposium will focus on the application of artificial intelligence (AI)-based algorithms in bone marrow diagnostics and the use of AI in myeloid neoplasm classification.

IMPORTANT DATES FOR ABSTRACT SUBMISSION

Submission starts	09 February 2026
Submission deadline	21 May 2026
Notification of acceptance	July 2026

CALL FOR CASE SUBMISSION

LYMPHOMA AND BONE MARROW WORKSHOPS

The corresponding lymphoma workshop is entitled 'lymphomas with prominent immune microenvironment', with the following 5 sessions:

- Nodal and extranodal T-cell lymphomas with prominent histiocytes, e.g. Lennert lymphoma, anaplastic large cell lymphoma (ALCL), associated with haemophagocytic lymphohistiocytosis (HLH); excluding cutaneous lymphoma
- B-cell lymphomas with prominent histiocytes, e.g. T-cell/histiocyte-rich large B-cell lymphoma (THRLBCL), THRLBCL-like lymphomas including Epstein-Barr virus positive diffuse large B-cell lymphoma (EBV+ DLBCL) and nodular lymphocyte -predominant Hodgkin lymphoma/ nodular lymphocyte predominant B-cell lymphoma (NLPHL/ NLPBL) pattern E, other aggressive or small B-cell lymphomas with granulomatous reaction
- Immune privileged site lymphomas excluding primary diffuse large B-cell lymphoma (DLBCL) of the brain parenchyma and testis (i.e. primary lymphomas of the ovary, adrenal gland, breast, meninges)
- Unusual cases of classic Hodgkin lymphoma (CHL), including lymphocyte-rich CHL and lymphocyte-depleted CHL, CD30 negative CHL, CHL with cytotoxic phenotype, T-follicular helper (TFH)-cell rich
- Primary mucosal or cutaneous CD30+ T-cell lymphoma/ lymphoproliferative disorders (LPDs); incl. lymphomatoid papulosis (LYP), cutaneous anaplastic large cell lymphoma (ALCL)

The bone marrow workshop invites submission of cases in the following categories:

- Myeloid neoplasms with significant fibrosis (excluding classic MPN) *e.g. cases that challenge the differential of fibrotic MDS (with and without excess blasts) and MDS/MPN*
- Myeloid neoplasms (including AML) with concomitant clonal mature T- or NK-cell proliferations/T-cell lymphomas
- Hypoplastic MDS and hypoplastic AML (de novo) including cases presenting with germline disposition *limited to adult cases (≥18 years)*

IMPORTANT DATES FOR CASE SUBMISSION

Submission starts	28 August 2025
Submission deadline	15 January 2026
Notification of acceptance	May 2026

REGISTRATION

The online registration will open December 2025. To register, please visit www.ea4hp-sh-meeting.com.

JOIN THE YEA4HP TO GET CONNECTED AND TAKE YOUR CAREER TO THE NEXT LEVEL

We are a group of early-career haematopathologists, residents, research and laboratory scientists, offering:

- A vibrant, international, multidisciplinary community
- Access to exciting opportunities for further learning, connection and collaboration
- Events and discussions that explore the latest field changing advances
- A yEA4HP session will be held during the 23rd EA4HP Meeting 2026. Visit the programme for more information.

23RD MEETING OF THE EUROPEAN ASSOCIATION FOR HAEMATOPATHOLOGY

The microenvironment of lymphoma
and lymphoproliferations
AI in bone marrow diagnostics

Berlin, Germany
3–8 October 2026

WELCOME TO BERLIN

DEAR COLLEAGUES AND FRIENDS,

On behalf of the European Association for Haematopathology (EA4HP) and the Society for Hematopathology (SH), it is my great pleasure as the head of the local organizing committee to invite you for the second time after 36 years to Germany again and particularly to Berlin, to attend the 23rd Meeting of the EA4HP. This will be held from 3rd to 8th October 2026 at the KOSMOS Berlin, a historic building inaugurated as cinema in 1961, which has been extensively modernized and provides state of the art technology and infrastructure. The meeting venue is in close distance to Alexanderplatz where numerous hotels, amenities and sites of interest can be found. For the participants unable to join us in Germany, there will be an option to register for the hybrid version of the meeting.

An exciting and interdisciplinary scientific programme is being currently delineated by the scientific committee considering also the proposals of the members who participated at an earlier EA4HP survey. The programme will offer a well-balanced mixture of scientific and practical issues of the topics to be covered. The general outline of the meeting will follow the traditional format starting with the educational session, followed by the Bone Marrow and Lymphoma symposia and workshops. The scientific programme will encompass also "Meet the Professor" sessions, satellite symposia, poster presentations and discussion. The faculty will include internationally renowned speakers that will address the most recent issues and controversies in the field of hematopathology.

Berlin, the capital and largest city of Germany is renowned for its exceptional range of historic landmarks, vibrant cultural scene and its unique atmosphere where history and future collide. It is one of the few cities that is home to three UNESCO World Heritage sites, the only city in the world to host three opera houses and can boast of more museums than the number of rainy days. Berlin also offers a high-octane nightlife and an exceptional dining diversity. The local organizing committee is working hard to provide an exciting social programme that will introduce you to some of what Berlin has to offer. Berlin is a large city, however easy to explore by its extensive public transport network. Tours and social events are also available in Berlin to give participants a richer experience of Berlin and its surroundings.

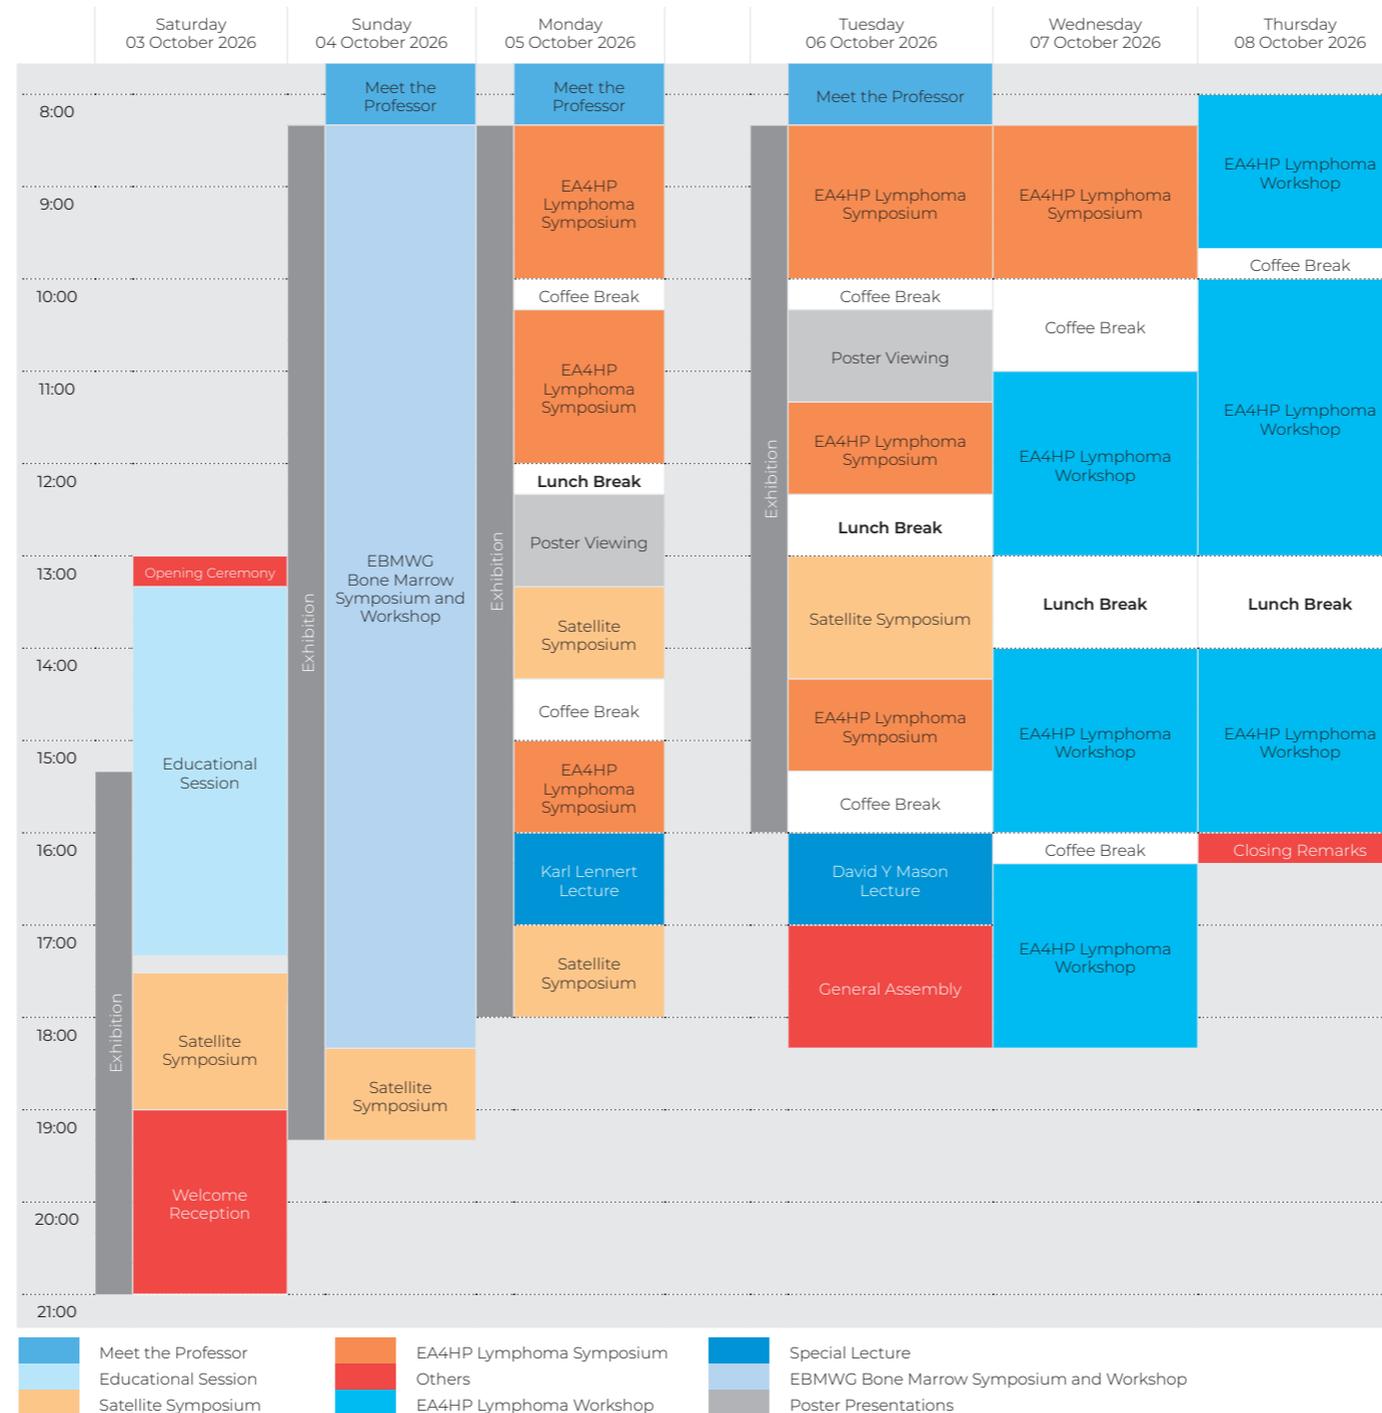

I am confident that this meeting will be an outstanding event, both professionally and socially.

See you in Berlin 2026!

Prof. Dr. Ioannis Anagnostopoulos MD
Local organiser EA4HP-SH Meeting 2026

AS A DELEGATE AT EA4HP 2026 YOU CAN EXPECT

- Excellent opportunities to meet and network with regional and global professionals in the field of haematopathology
- To learn from experiences of the internationally renowned community and contribute with your own expertise
- An opportunity to meet potential mentors who can help you advance your career
- To exchange ideas, broaden your horizons and discover new perspectives and potential for collaboration
- To create interdisciplinary bonds and find joint solutions
- Be part of an inspiring environment
- To develop new ideas for your research projects
